

BUILDER ADVISORY

Energy Step Code Implementation

On February 19, 2019 the Council of the Village of Anmore approved an amendment to the Village of Anmore Building Bylaw to require compliance with Step 1 of the Energy Step Code for construction of all new single family dwellings.

Prior to the issuance of a building permit for a new single family dwelling, applicants will be required to engage an energy advisor through a licenced service organization. A list of accredited energy advisors is available on the URL link below. In addition, applicants in consultation with their energy advisors must submit the following information:

- Thermal energy demand intensity
- Mechanical total energy use intensity

Applicants are advised to engage an energy advisor as soon as possible in the planning process so that any issues may be identified early and resolved as expeditiously as possible. Please contact the Village or the Energy Step Code Council for addition information.
