Stage 4 is an emergency stage that limits both indoor and outdoor water uses as much as possible to ensure an adequate supply of drinking water for human consumption, use in firefighting and to protect the quality of drinking water within the water system for public health.

Stage 4 is activated based on the rare occurrence of a significant emergency, such as an earthquake, flood, wild land and interface fire, severe weather, or a prolonged regional power outage that causes significant impacts to the water system infrastructure (e.g. damage to major water transmission lines, pump stations, or treatment plants).

In addition to the following outdoor water restrictions, Metro Vancouver could request that industrial water users implement voluntary reductions or reschedule production processes that consume large amounts of water until Stage 4 is deactivated.

For cul-de-sacs longer than 600 meters, alternate means for intermediate turn-a-rounds shall be comprised of P-type cul-de-sacs offset from the main road or a traffic circle with appropriate landscaped islands to delineate traffic paths. Use of temporary T-type turn-a-rounds will not be permitted.
