

LGCAP Year 2 Survey

0%	

Introduction

Reaching <u>net-zero emissions</u> and adapting to a changing climate will require a whole-of-society approach. The new Local Government Climate Action Program (the Program or LGCAP) aims to catalyze the efficient flow of financial resources, data and knowledge between Modern Treaty Nations, local governments, and the Provincial Government to allow for cost effective, impactful, locally implemented climate action. For more information about the Program you can refer to the <u>website</u> and <u>Program Guide</u>.

What is climate action?

For the purposes of this program, a climate initiative or action is one that reduces greenhouse gas (GHG) emissions and/or strengthens resilience to the impacts of climate change (adaptation). This includes (but is not limited to): climate-related hazards; integrating climate change measures into policies, strategies and planning; improving education, raising awareness of climate change causes and solutions, increasing human and institutional capacity with respect to climate change mitigation and adaptation, and impact reduction and early warning systems.

Information collected will:

- Highlight local government and Indigenous climate leadership;
- Profile action by including local government and Modern Treaty Nation emissions, resilience and climate action performance data in the annual <u>Climate Change</u> <u>Accountability Report;</u>
- Help inform policy development and monitor progress on achieving provincial and local climate objectives; and
- Support provincial efforts to better collaborate with and support communities to advance climate action.

The survey was informed by:

- Feedback from local governments, Modern Treaty Nations and ministerial partners;
- National and international GHG reporting protocols; and
- The <u>CDP</u> (global disclosure system).

<u>Instructions</u>

*Please do not provide any personal information (e.g. email, phone number) in the survey.

Survey: Word Version

A survey template (i.e. a Word version) is available on the <u>Local Government Climate Action Program webpage</u>. The template can be used to gather information from staff across departments. Then simply cut and paste into the online version where you'll be submitting the survey.

Survey: Online Version

SimpleSurvey allows multiple users to access your survey, though two people **cannot** enter information at the same time.

- For other users to contribute to your survey, simply share the unique link with your team members.
- Users must select "Save and continue later" when they are done updating the survey but not ready to submit.

Required fields are indicated with a red asterisk (*). You will not be able to submit the survey and attestation form without completing these fields.

• Some fields have formatting considerations (i.e. numbers only). You will not be able to submit the survey and attestation form until all required fields are completed properly. The red text error message will indicate what is needed.

Attestation Form

The attestation form is filled in after survey questions are completed. It is the second page of the SimpleSurvey submission.

- The attestation form is where the Chief Financial Officer, or equivalent position, attest to the following:
 - That Local Government Climate Action Program funding has been, or will be, allocated to climate action.
 - That Local Government Climate Action Program funds held in reserve will be spent by March 31, 2025.
 - That a completed and signed version of this form and survey contents will be publicly posted by September 30, 2023.

Requirements

1. Reporting

- 1. Report on **at least one** project linked to objectives from the <u>CleanBC Roadmap to</u> <u>2030</u> and/or <u>Climate Preparedness and Adaptation Strategy</u>. If your community reports one initiative related to one sector (e.g. buildings) you have satisfied this requirement. Funding for the project(s) does **not** need to come from this program.
- 2. Attest that funds will be allocated to climate initiatives before submitting your survey.
- 3. For communities with populations of 15,000+, measuring and reporting local government or Nation's corporate emissions is required.
- Optional open-ended questions asking for one or more initiatives related to climate action may be highlighted in the LGCAP Year 2 Summary Report or other Program materials to acknowledge innovative local climate solutions.

2. Deadline to submit the survey & attestation form

 The deadline for submitting your survey and attestation form is 4 PM PDT on July 31, 2023.

3. Posting the survey & attestation form publicly

- The design / format of the form **can** be changed however all information from required questions must be included.
- Optional questions and answers can be omitted.
- The deadline to post the survey and attestation form publicly is September 30, 2023.

Download a copy for your records!

Once submitted, you can **download a copy of the completed survey** and attestation form (PDF, Excel, and Word options). If you close this window before the download link appears, please reach out for a copy of your submission.

Support

If the survey is accidentally submitted, a submitted survey needs to be revised, or if you have any questions, please reach out to us at <u>LGCAP@gov.bc.ca</u>. We will be happy to provide assistance.

Thank you!
The LGCAP Team

The Survey

Climate Action Planning

Climate Action Plans are strategic roadmaps that identify how an organization will reduce their greenhouse gas (GHG) emissions (mitigation), increase their resilience to the impacts of climate change (adaptation), or a combination of both.

To answer the following questions, consider staff that contribute to activities that reduce greenhouse gas (GHG) emissions and/or strengthen resilience and the ability to adapt to climate-induced impacts. This includes (but is not limited to): climate-related hazards; integrating climate change measures into policies, strategies and planning; improving education, raising awareness of climate change causes and solutions, increasing human and institutional capacity with respect to climate change mitigation and adaptation, and impact reduction and early warning systems.

*Question 1: How many staff in full time equivalents (FTEs) are dedicated to working on climate action?

For example: Can include staff in engineering, emergency management, sustainability, transportation, waste management, etc.

If a staff member is a climate action coordinator and works 100% on climate-related issues, add 1.0. If a staff member works approximately 25% (please estimate) on climate-related issues, add 0.25. Working on climate-related issues does not need to be written into the staff member's job description to be counted here.

0		

*Question 2: Does your local government or Nation have a climate action plan or other guiding document(s)?

Yes

X No

- *If not, please select one or more options from the list.
 - No, but we are currently undertaking one and it will be completed in the next two years.
 - No, we are not intending to undertake one due to lack of financial capacity.

No, we are not intending to undertake one due to lack of expertise or technical capacity.
*Question 3: Has your local government or Nation declared a climate emergency?
○ Yes
× No
*Question 4: Please select the top 3 challenges impeding the advancement o climate action in your community.
Lack of jurisdiction.
X Lack of staff capacity or expertise.
X Lack of financial resources.
Lack of data or information.
Lack of local political support.
Lack of provincial or federal government support or collaboration.
× Other. Small local government

Corporate Greenhouse Gas Emissions

Measuring corporate emissions is a Program requirement for all communities with a 2020 population of 15,000 and above (<u>see population statistics here</u>). Corporate GHG emissions are those produced by the delivery of local government or Modern Treaty Nation "traditional services" including:

- Fire protection,
- Solid waste management,
- Recreational / cultural services,
- Road and traffic operations,
- Water and wastewater management, and
- Local government administration.

Please see the following resources for guidance:

- Scope Summary Document,
- Corporate Inventory Reporting Tool,
- Becoming Carbon Neutral Guidebook (Scope),

- Carbon Neutral Workbook (Scope),
- Contracted Services Emissions Guidance,
- Contracted Emissions Calculator,
- 2022 BC Best Practices Methodology for Quantifying GHG Emissions, and
- Emission Factors Catalogue.

	Question 5: For the 2022 calendar year, has your local government or Nation measured and reported associated corporate GHG emissions?
	○ Yes
	× No
	O No, but for a past year. (Please enter most recent year completed: YYYY)
*	If not, please select all that apply.
	× No, due to lack of staff and technical capacity.
	No, due to lack of financial resources.
	No, due to lack of awareness regarding which GHG accounting tools are available.
	No, corporate emissions are measured but not reported.
	Measurement is in-progress.
	Corporate inventory is not developed annually.
	Optional: Please provide any further comments you wish to share on corporate emissions measurement and reporting here (e.g. system or approach used to measure corporate emissions).
	A free SmartTool converter would be helpful in adding this as a side project to our already lir

Community-Wide Greenhouse Gas Emissions

B.C. Climate Action Charter signatories have committed to measuring and reporting their community-wide GHG emissions generated from all GHG sources (anthropogenic) within their community boundary.

The Community Energy and Emissions Inventory (CEEI) initiative provides a provincial framework for tracking and reporting energy and GHG emissions at a community-wide scale. It is published with a two-year lag, however, raw data can be requested by local governments that wish to measure and report their community-wide emissions for the buildings and solid waste sectors ahead of publication.

The Climate Action Secretariat (CAS) is aware that some local governments are developing their own community-wide GHG emissions inventories (separate from the provincial CEEI). A better understanding of community-wide emissions measurement across B.C. will help CAS as we upgrade CEEI.

*	Qι	grade CEEI. Juestion 6: For the 2022 calendar year, have community-wide GHG Thissions been measured for your local government or Nation?
		Yes
	\bigcirc	In-progress
	X	No
*	lf ı	not, please select all that apply from the list.
		No, community GHG emissions were not reported because the 2022 Provincial Community Energy and Emissions Inventory data has not been released.
		No, community GHG emissions were not reported because the 2022 Provincial Community Energy and Emissions Inventory does not report transportation data.
)	X	No, we do not measure and report community-wide emissions data due to lack of financial capacity.
>	<	No, we do not measure and report community-wide emissions data due to lack of staff and technical capacity.
		No, we do not measure and report community-wide emissions annually. (Please indicate most recent year completed: YYYY)

*If not, has your community or Nation measured and reported community-wide emissions in the past?

NoQuestion 7: Currently, the Province's legislated GHG emission reduc

<u>Provincial Policy Alignment - Mitigation</u>

The CleanBC Roadmap to 2030 is B.C's plan to meet provincial emissions reduction targets to be 40% below 2007 levels for 2030 and set on course to reach net-zero emissions by 2050.

One requirement of this Program is that you must **report on a minimum of one project** linked to objectives from the <u>CleanBC Roadmap to 2030</u> and/or <u>Climate Preparedness and Adaptation Strategy</u> (CPAS). Funding does **not** need to come from this program. For questions 10-12, if your community reports one initiative related to one sector (e.g. buildings) you have satisfied this requirement. That said, please select all that apply.

Question 10: Please indicate all climate initiatives your local government or
Nation had in-progress or completed in the 2022 calendar year related to
the buildings sector .
The <u>buildings and communities</u> <u>sectoral target</u> for the province is 59% to 64% emissions reductions by 2030.
Zero-carbon new construction (please enter date in pop-up textbox below)
Highest efficiency standards for new space and water heating equipment
Topping up Provincial energy efficiency programs
× Step Code adoption
Zero Carbon Step Code
Zero-carbon heating requirement
Net zero buildings commitments
Efficiency upgrades to public buildings
Demand-side management
Not applicable
Other

Optional: Please highlight a community project(s) that was in-progress or completed in the 2022 calendar year related to **buildings**.

	uestion 11: Please indicate all climate initiatives your local government or
	ation had in-progress or completed in the 2022 calendar year related to
th	e transportation sector.
Th	ne transportation <u>sectoral target</u> for the province is 27% to 32% emissions reductions by 2030.
	Demand-side management to reduce distance travelled (single-occupancy vehicle commute reduction programs, parking disincentives)
X	Improving or expanding public transportation
	Mode shift targets in Official Community Plan, Regional Growth Strategy or other guiding document
	Established personal transportation target goals, and measures to reach them, in annual reports – must include target goals for vehicle kilometre reduction, mode share for active transportation and zero-emission vehicles – and report on progress
	Established commercial transportation target goals, and measures to reach them, in annual reports – must include target goals for vehicle kilometre reduction, mode share for energy efficient commercial transportation and zero-emission vehicles – report on progress
	Implemented zero-emission vehicle first procurement policy for all local government on and off-road vehicles purchases.
	Implemented a zero-emission vehicle preference or requirement for contracted work from a service provider
	Bylaws updated to prioritize energy efficient transportation hierarchy (i.e. pedestrians first)
	Revising existing bylaws or implementing new ones to support active transportation
	Active transportation planning
X	Active transportation infrastructure investments
	Electric vehicle charging studies/planning
	Established electric vehicle charging ready bylaws
	Electric vehicle charging infrastructure investments
	Streamlined hydrogen fuelling station permitting process
_

Provincial Policy Alignment - Resilience and Adaptation

The goal of climate adaptation is to reduce risk and vulnerability associated with climate change impacts. To manage climate impacts, local governments and Nations are integrating adaptation principles into decisions and everyday activities. One requirement of this program is to report on projects linked to one or more objectives from the CleanBC Roadmap and/or the CPAS.

One requirement of this Program is that you must report on **at least one or more** project(s) linked to one or more objectives from the <u>CleanBC Roadmap to</u>
2030 and/or <u>Climate Preparedness and Adaptation Strategy</u> (CPAS) in Questions 10-13. If your community reports one initiative related to one sector you have satisfied this requirement, but please select all that apply for Questions 10-13.

LGCAP Year 1 Funding

The Program must be able to demonstrate the impact this funding has on greenhouse gas emissions reductions and resilience and adaptation in B.C. To substantiate the Program, we

must develop a baseline understanding of where local governments and Nations are at with respect to climate action and track progress over time.

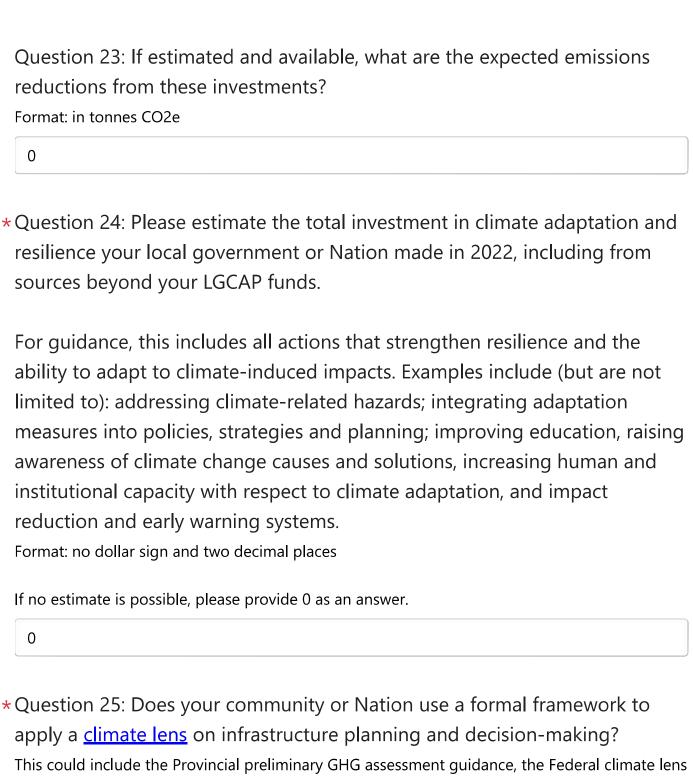

Please do your best to specify how much of your LGCAP funds was invested for each initiative undertaken without double counting.

*Question 20: What did/will your local government or Nation spend its LGCAP funding on for year one of the Program (2022)? Please select all that apply and indicate the total dollar value associated with each initiative (including funding from all sources).

Textbox format: no dollar sign and up to two decimal points (i.e. 2500 or 657.25).

If selecting "Other", please write both the item and the amount of funding in the textbox.

*Question 22: Please estimate the total investment in climate mitigation your local government or Nation made in 2022, including from sources beyond your LGCAP funds. For guidance, this includes (but is not limited to): integrating climate change mitigation (i.e. GHG reduction) measures into policies, strategies and planning; improving education, raising awareness of climate change causes and solutions, and increasing human and institutional capacity with respect to climate change mitigation.

*Question 25: Does your community or Nation use a formal framework to guidance, or another climate lens framework.

Yes

x No

Local Government Climate Action Program Attestation Form

Instructions for the Attestor (CFO or equivalent staff person): Complete and sign this form by filling in the fields below.

I, the Chief Financial Officer, or equivalent position, attest to the following:

- That Local Government Climate Action Program funding has been, or will be, allocated to climate action.
- That Local Government Climate Action Program funds held in reserve will be spent by March 31, 2025.
- That a completed and signed version of this form and survey contents will be publicly posted by September 30, 2023.
