Subject: Notice of Construction: Dr. Hal Weinberg Spirit Park Expansion Project

Village of Anmore Contract T26-03 – 2026 Dr. Hal Weinberg Spirit Park Expansion

To Whom It May Concern,

This letter informs you that we will conduct park, roadway, and infrastructure upgrades at Dr. Hal Weinberg Spirit Park, with construction expected to begin in September 2026 and extend to February 2027. This notice provides an overview of the planned improvements, anticipated construction impacts, and contact information should you have any questions regarding the project.

What to Expect During Construction

Construction activities will begin in September 2026 and continue in phases. During this time, residents may experience temporary traffic pattern changes, construction noise, and periodic increases in construction vehicle activity in the area. Construction is anticipated between 7 am - 5 pm on weekdays and between 9 am - 5 pm on Saturdays (per Village bylaws). There will be no construction on Sundays and/or statutory holidays.

To facilitate roadway and infrastructure improvements, a portion of Ravenswood Drive will be temporarily closed, and traffic will be redirected via an alternate access route. Access to all properties will be maintained throughout construction. Please refer to the enclosed drawing for details regarding the temporary traffic changes, dates, and alternate vehicle access route.

Key Project Improvements

An enclosed drawing is provided to illustrate the planned improvements. Please review the drawing and consider where your property is located and the upgrades that will occur near your property. Of note, upgrades will include the following:

- **Parking Lot and Roadway Improvements:** The existing Dr. Hal Weinberg Spirit Park parking lot will be upgraded, and a portion of Ravenswood Drive will be realigned. Parking lot improvements will provide additional stalls and lighting for enhanced access for visitors to the park and the Anmore Community Hub.

- **Park Enhancements:** New drainage, expanded lawn and meadow areas, forest restoration areas, shade trees, bioswales, a naturalised drainage stream, walking paths, picnic and seating areas, bicycle racks and other visitor amenities.
- **Storm Drainage:** New storm sewer infrastructure, asphalt curbs, and gutters will be installed to improve drainage and effectively manage rainwater runoff from roads, pathways, the parking lot, and park areas.
- **Canada Post Mailbox Relocation:** Relocation of mailbox from existing parking lot to Ravenswood Drive. Additional adjacent off-street parking will also be provided to improve access. The mailboxes are anticipated to be installed in the new location in mid-October 2026. Canada Post will notify area residents of the relocation.

The Village and project team will make every effort to minimize disruptions during construction. Additional notices will be provided as required for significant traffic changes, service interruptions, or other project updates.
